SLASHER FILM

BY ANDREW J. RIES

You'll need to cut some characters to complete this "slasher" of a puzzle. Eleven Across clues include one extra letter that must be removed in order to solve the clue. In addition, eleven Down entries each need one letter removed before placement in the grid, in each case creating a new, valid word. The letters cut from the Down entries, when placed in their corresponding position in the shaded row underneath the grid, will reveal the character who made the cut; the letters cut from the Across clues, reading from top to bottom, will reveal the character who didn't survive the cut. For an extra challenge, Down enumerations have been removed.
